3

The screenshot displays the Programiz C# Online Compiler interface. The editor shows a C# program named 'Main.cs' with the following code:

```
1 // #3 Area of Rectangle
2
3 using System;
4
5 class Program
6 {
7     static void Main()
8     {
9         // Ask for the length
10        Console.WriteLine("Enter length:");
11        int length = Convert.ToInt32(Console.ReadLine());
12
13        // Ask for the width
14        Console.WriteLine("Enter width:");
15        int width = Convert.ToInt32(Console.ReadLine());
16
17        // Display the calculation area
18        int area = length * width;
19        Console.WriteLine("Area: " + area);
20    }
21 }
```

The 'Run' button is highlighted in blue. The output window on the right shows the execution results:

```
Enter length:
12
Enter width:
15
Area: 180

--- Code Execution Successful ---
```

The screenshot shows the Programiz C# Online Compiler interface. The code editor on the left contains a C# program named 'Main.cs'. The program prompts the user to enter their first and last names and then displays the full name. The output window on the right shows the results of the program execution.

```
1 // #7 Full Name
2
3 using System;
4
5 class Program
6 {
7     static void Main()
8     {
9         // Ask for the first name
10        Console.WriteLine("Enter first name:");
11        string firstName = Console.ReadLine();
12
13        // Ask for the last name
14        Console.WriteLine("Enter last name:");
15        string lastName = Console.ReadLine();
16
17        // Display the full name
18        string fullName = firstName + " " + lastName;
19        Console.WriteLine("Full Name: " + fullName);
20    }
21 }
```

Output:

```
Enter first name:
Raya Llyanne
Enter last name:
Bernabe Palmes
Full Name: Raya Llyanne Bernabe Palmes

The screenshot shows the Programiz C# Online Compiler interface. The code editor on the left contains a C# program named 'Main.cs' which is a shopping calculator. The code prompts the user for a product name, price, and quantity, then calculates the total. The output window on the right shows the results of the program execution.

```
1 // #8 Shopping Calculator
2
3 using System;
4
5 class Program
6 {
7     static void Main()
8     {
9         // Ask for the product name
10        Console.WriteLine("Enter product name:");
11        string product = Console.ReadLine();
12
13        // Ask for the price
14        Console.WriteLine("Enter price:");
15        double price = Convert.ToDouble(Console.ReadLine());
16
17        // Ask for the quantity
18        Console.WriteLine("Enter quantity:");
19        int quantity = Convert.ToInt32(Console.ReadLine());
20
21        // Calculate the total
22        double total = price * quantity;
23        Console.WriteLine("Total: " + total);
24    }
25 }
```

Output

```
Enter product name:
SIPS AND STARS
Enter price:
250
Enter quantity:
3
Total: 750

=== Code Execution Successful ===
```

The screenshot shows the Programiz C# Online Compiler interface. The code editor on the left contains a C# program named 'Main.cs' with the following code:

```
1 // #9 Salary Calculator
2
3 using System;
4
5 class Program
6 {
7     static void Main()
8     {
9         // Ask for the employee name
10        Console.WriteLine("Enter employee name:");
11        string name = Console.ReadLine();
12
13        // Ask for hours worked
14        Console.WriteLine("Enter hours worked:");
15        double hours = Convert.ToDouble(Console.ReadLine());
16
17        // Ask for hourly rate
18        Console.WriteLine("Enter hourly rate:");
19        double rate = Convert.ToDouble(Console.ReadLine());
20
21        // Calculate the salary
22        double salary = hours * rate;
23        Console.WriteLine("Salary: " + salary);
24    }
25 }
26
```

The 'Run' button is highlighted in blue. The output panel on the right shows the following text:

```
Enter employee name:
Elisha Camille Bernabe
Enter hours worked:
8
Enter hourly rate:
1000
Salary: 8000
