Name: Raya Llyanne Bernabe Palmes	SCORE:
Section: BFIS01	Date: 09/01/ 2026

1.

Programiz
C# Online Compiler

Main.csRun

```
1 // #1 Student Information
2
3 using System;
4
5 class Program
6 {
7     static void Main()
8     {
9         // Ask for the student's name and get the input.
10        Console.WriteLine("Name:");
11        string name = Console.ReadLine();
12
13        // Ask for the student's course and get the input.
14        Console.WriteLine("Course:");
15        string course = Console.ReadLine();
16
17        // Ask for the student's year level and get the input.
18        Console.WriteLine("Year Level:");
19        string yearLevel = Console.ReadLine();
20
21        // Ask for the student's section and get the input.
22        Console.WriteLine("Section:");
23        string section = Console.ReadLine();
24
25        // Display all the information entered by the student.
26        Console.WriteLine("Name: " + name);
27        Console.WriteLine("Course: " + course);
28        Console.WriteLine("Year Level: " + yearLevel);
29        Console.WriteLine("Section: " + section);
30    }
31 }
```

Output

```
Name:
21
Course:
BSIS
Year Level:
2nd Year
Section:
BSIS01
Name: 21
Course: BSIS
Year Level: 2nd Year
Section: BSIS01

=== Code Execution Successful ===

2

Programiz
C# Online Compiler

Run

```
1 // #1 Basic Calculator
2
3 using System;
4
5 class Program
6 {
7     static void Main()
8     {
9         // Ask for the first number.
10        Console.WriteLine("Enter first number:");
11        int num1 = Convert.ToInt32(Console.ReadLine());
12
13        // Ask for the second number.
14        Console.WriteLine("Enter second number:");
15        int num2 = Convert.ToInt32(Console.ReadLine());
16
17        // Display the calculation results.
18        Console.WriteLine("Addition: " + (num1 + num2));
19        Console.WriteLine("Subtraction: " + (num1 - num2));
20        Console.WriteLine("Multiplication: " + (num1 * num2));
21        Console.WriteLine("Division: " + (num1 / num2));
22    }
23 }
```

Output

```
Enter first number:
15
Enter second number:
21
Addition: 36
Subtraction: -6
Multiplication: 315
Division: 0

=== Code Execution Successful ===
```

3

The screenshot shows the Programiz C# Online Compiler interface. The code in Main.cs is as follows:

```
1 // Area of Rectangle
2
3 using System;
4
5 class Program
6 {
7     static void Main()
8     {
9         // Ask for the length
10        Console.WriteLine("Enter length:");
11        int length = Convert.ToInt32(Console.ReadLine());
12
13        // Ask for the width
14        Console.WriteLine("Enter width:");
15        int width = Convert.ToInt32(Console.ReadLine());
16
17        // Display the calculation area
18        int area = length * width;
19        Console.WriteLine("Area: " + area);
20    }
21 }
```

The output shows the program execution with inputs 12 for length and 15 for width, resulting in an area of 180.

```
Enter length:
12
Enter width:
15
Area: 180

=== Code Execution Successful ===
```

4

The screenshot shows the Programiz C# Online Compiler interface. The code in Main.cs is as follows:

```
1 // #4 Student Grade
2
3 using System;
4
5 class Program
6 {
7     static void Main()
8     {
9         // Ask for Grade 1
10        Console.WriteLine("Enter Grade 1 (Prelim):");
11        double prelim = Convert.ToDouble(Console.ReadLine());
12
13        // Ask for Grade 2
14        Console.WriteLine("Enter Grade 2 (Midterm):");
15        double midterm = Convert.ToDouble(Console.ReadLine());
16
17        // Ask for Grade 3
18        Console.WriteLine("Enter Grade 3 (Final):");
19        double final = Convert.ToDouble(Console.ReadLine());
20
21        // Calculate the average
22        double average = (prelim + midterm + final) / 3;
23        Console.WriteLine("Average: " + average);
24    }
25 }
```

The output shows the program execution with inputs 92 for Prelim, 92.5 for Midterm, and 94 for Final, resulting in an average of 92.83333333333333.

```
Enter Grade 1 (Prelim):
92
Enter Grade 2 (Midterm):
92.5
Enter Grade 3 (Final):
94
Average: 92.83333333333333

=== Code Execution Successful ===

5

Programiz
C# Online Compiler

Main.csRun

```
1 // #5 Boolean Input
2
3 using System;
4
5 class Program
6 {
7     static void Main()
8     {
9         // Ask if the user is a student
10        Console.WriteLine("Are you a student? (true/false)");
11        bool isStudent = Convert.ToBoolean(Console.ReadLine());
12
13        // Display the answer
14        Console.WriteLine("Are you a student? " + isStudent);
15    }
16 }
```

Output

```
Are you a student? (true/false)
true
Are you a student? True

=== Code Execution Successful ===
```

6

The screenshot shows the Programiz C# Online Compiler interface. The code in `Main.cs` is as follows:

```
1 // #6 Age Verification
2
3 using System;
4
5 class Program
6 {
7     static void Main()
8     {
9         // Ask for the user's age
10        Console.WriteLine("Enter your age:");
11        int age = Convert.ToInt32(Console.ReadLine());
12
13        // Check if the user is 18 or older
14        bool isAdult = age >= 18;
15
16        // Display the result
17        Console.WriteLine("Is Adult: " + isAdult);
18    }
19 }
```

The output on the right shows the program's execution with the input '21':

```
Enter your age:
21
Is Adult: True

--- Code Execution Successful ---
```

7

The screenshot shows the Programiz C# Online Compiler interface. The code in `Main.cs` is as follows:

```
1 // #7 Full Name
2
3 using System;
4
5 class Program
6 {
7     static void Main()
8     {
9         // Ask for the first name
10        Console.WriteLine("Enter first name:");
11        string firstName = Console.ReadLine();
12
13        // Ask for the last name
14        Console.WriteLine("Enter last name:");
15        string lastName = Console.ReadLine();
16
17        // Display the full name
18        string fullName = firstName + " " + lastName;
19        Console.WriteLine("Full Name: " + fullName);
20    }
21 }
```

The output on the right shows the program's execution with inputs 'Raya' and 'Palmes':

```
Enter first name:
Raya
Enter last name:
Palmes
Full Name: Raya Palmes

--- Code Execution Successful ---
```

8

The screenshot shows the Programiz C# Online Compiler interface. The code editor on the left contains a C# program named 'Main.cs' with the following code:

```
1 // #8 Shopping Calculator
2
3 using System;
4
5 class Program
6 {
7     static void Main()
8     {
9         // Ask for the product name
10        Console.WriteLine("Enter product name:");
11        string product = Console.ReadLine();
12
13        // Ask for the price
14        Console.WriteLine("Enter price:");
15        double price = Convert.ToDouble(Console.ReadLine());
16
17        // Ask for the quantity
18        Console.WriteLine("Enter quantity:");
19        int quantity = Convert.ToInt32(Console.ReadLine());
20
21        // Calculate the total
22        double total = price * quantity;
23        Console.WriteLine("Total: " + total);
24    }
25 }
```

The 'Run' button is highlighted in blue. The output panel on the right shows the following text:

```
Enter product name:
Skin Care
Enter price:
300
Enter quantity:
2
Total: 600

=== Code Execution Successful ===
```
